# INSTRUCTIONS - *Setting the Trap*
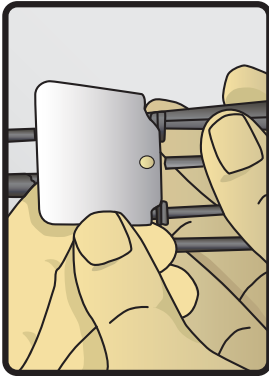

Step 1: Holding the trap in one hand, place the **trigger wire** through the bottom of the trap as shown.
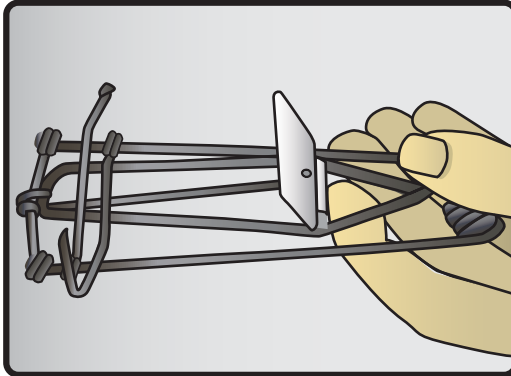

Step 2: Hold the **trigger wire** above the **trigger plate** with one hand. With your other hand, place your fingers underneath the trap and use your thumb to push the **loop** down to connect the catch around the **loop**. Keep applying pressure to the **trigger wire** to hold the **trigger wire** on the **loop**.
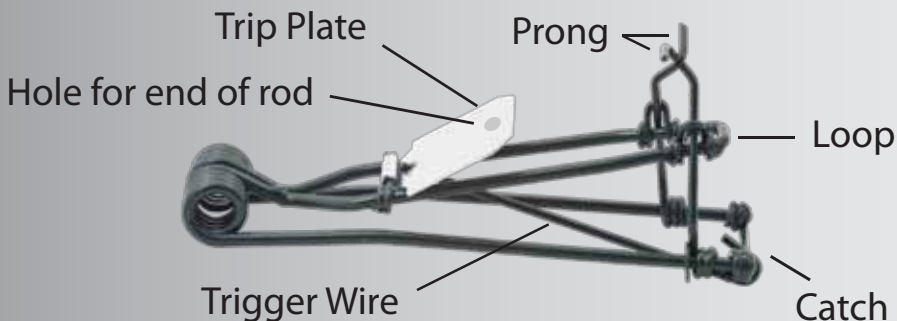

Step 3: While keeping your hand on the **trigger wire**, lift up the **trigger plate** to put the **trigger wire** through the **trigger plate**.

Step 4: Push down on the **trigger plate** to keep the **trigger wire** in place.

Step 5: Slowly release the **trigger plate**. The trap is now set.
